

Quick API reference

Version 1.1d

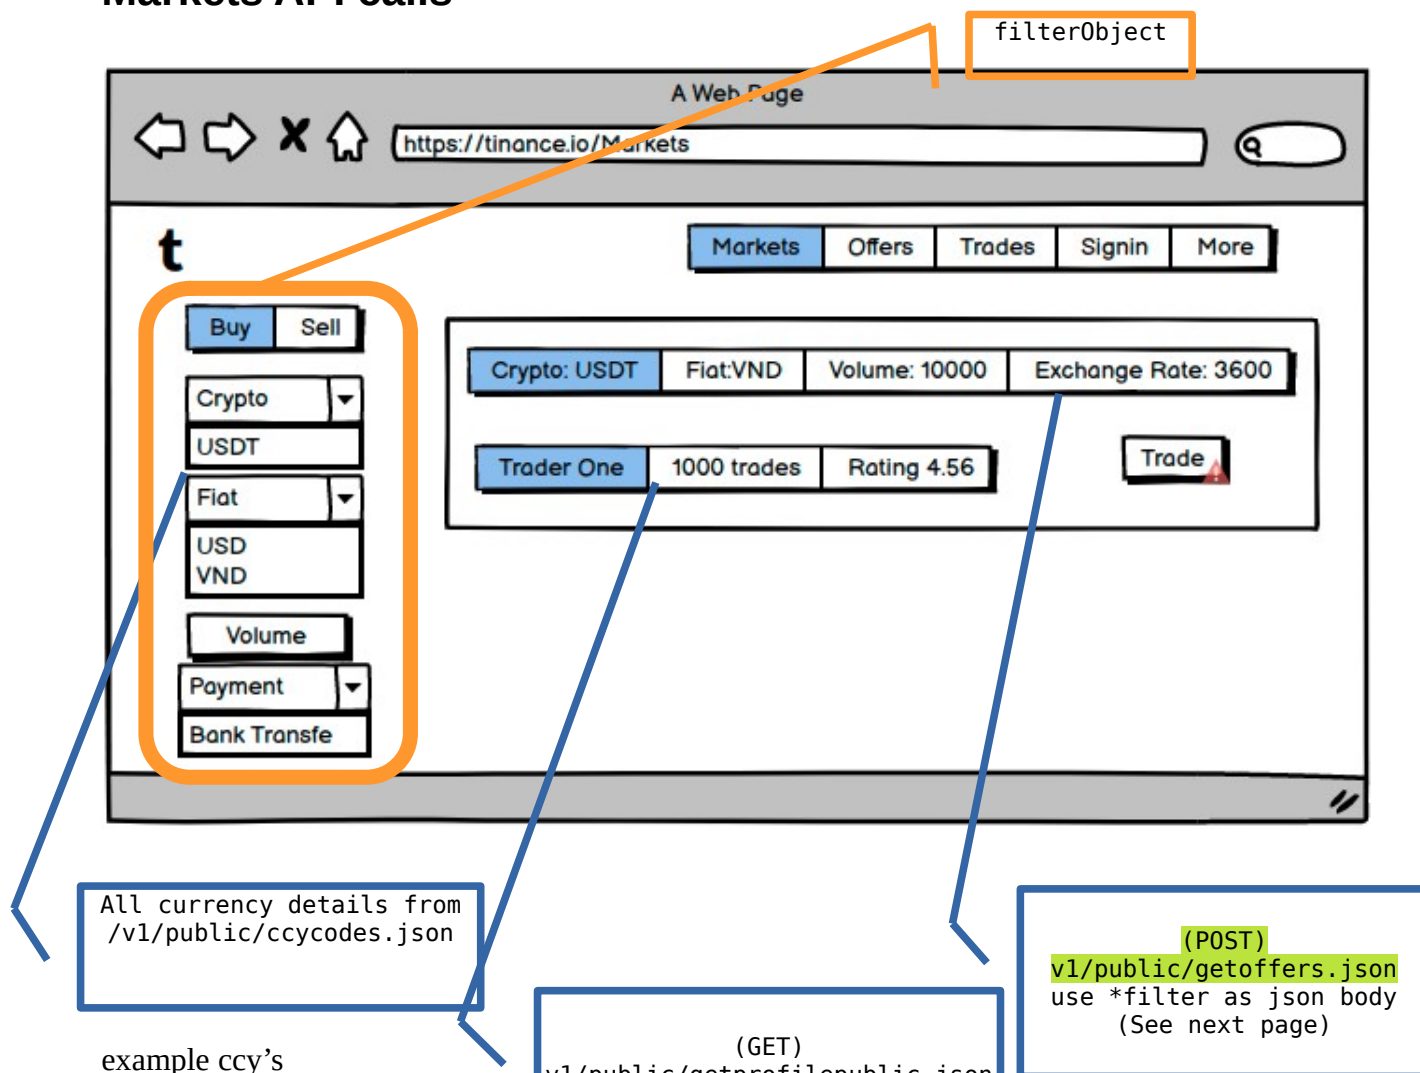

28 Jun 2021

The filter object is used in some calls.

```
filter Object
{
  boolean buy;
  boolean sell;    // both can be true and false
  long fromccyid;
  long toccyid;
  List<Long> payTypes; //: [ pay ids,.. ], <empty is wildcard>
  List<String> status; // empty is wildcard
  double fromamt;
}
```

Like This = recently changed, please recheck your code

Markets API calls

example ccys

```
{
  "id": 8,
  "name": "USD",
  "description": "United States Dollar",
  "enable": true,
  "ccyType": "Fiat",
  "tokenCtrAddress": "",
  "timestamp": 1624576320000
},
{
  "id": 9,
  "name": "USDT",
  "description": "Tether USD Anchor",
  "enable": true,
  "ccyType": "ERC20",
  "tokenCtrAddress": "0xEd7C9D32a6Db131c638C3E475F66908446D80eC",
  "timestamp": 1624576320000
},
}
```

example payment types

```
{
  "id": 1,
  "name": "Bank Transfer",
  "enabled": true,
  "field1name": "Bank Name",
  "field2name": "Sort Code",
  "field3name": "Account Number",
  "field4name": "IBAN",
  "field5name": "Country"
},
}
```

fieldnames are the fields to populate when entering details. Each payment type will have 5 fields and may be different from above example.

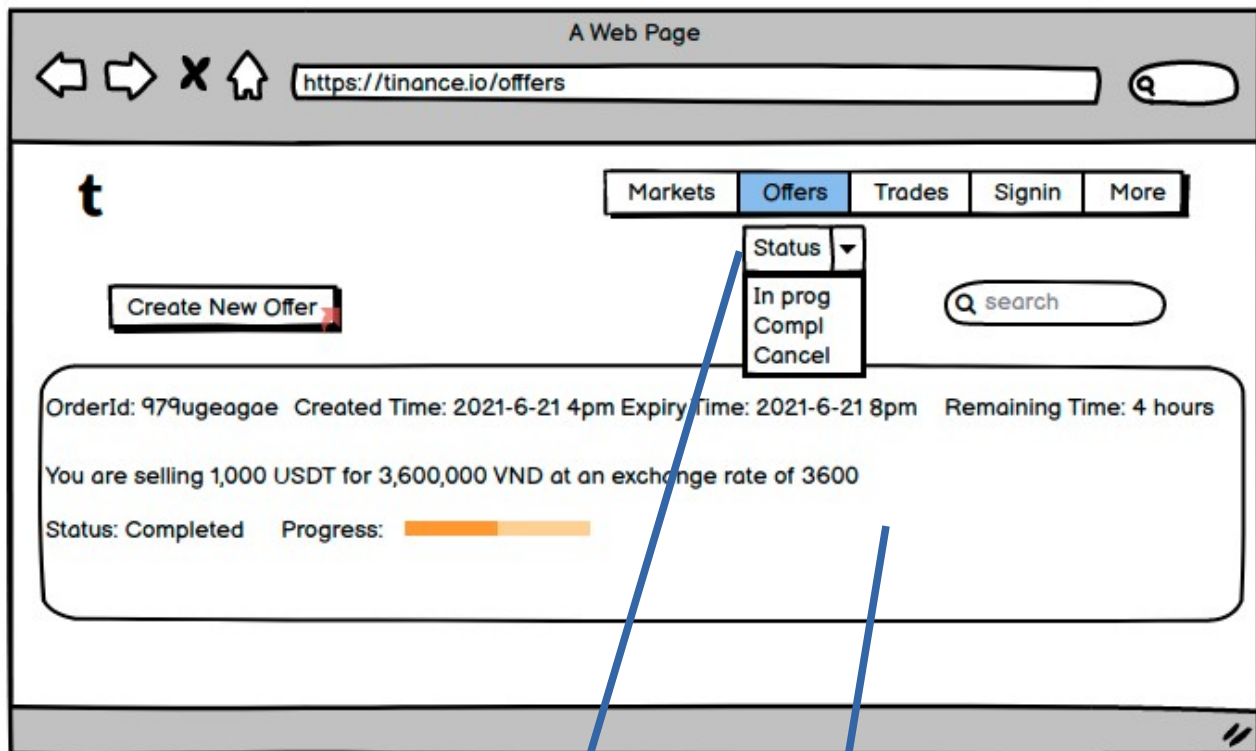

Return result from v1/public/getoffers.json

```
{
  "buyer": true,    ==> show as "SELL" when buyer=false, show as "BUY"
  "complete": false, ==> Only display as offer when complete = false
  "created": "2021-06-27T14:26:31.329Z",
  "custRef": "string",
  "exchRate": 1.6750, ==> exchange rate
  "expiry": "2021-06-27T14:26:31.329Z", ==> Display this as moment() i.e. 3 days 5 hours remaining
  "feeAmt": 0,
  "fromAmount": 0,
  "fromccy": {

}
```

Return result from v1/public/getprofilepublic.json

```
{
  "blurb": "string",
  "cid": 0,
  "disable": true,
  "email": "string",
  "feedback": 0,    ==> rating 1.5
  "lastseen": "2021-06-28T06:45:04.810Z", ==> add to details
  "msg_mailshot": true,
  "msg_updates": true,
  "phone": "string",
  "tradecount": 0,    ==> as per slide
  "username": "TraderOne", ==> as per slide
  "verified": true    ==> add to details
}
```

Offers API calls

After logging in...

** STATUS FILTER

Use filter object
Set
status["IN_PROGRESS"]
or
status["COMPLETE"]
etc

(POST)
v1/getmyoffers.json

use *filter as json body
(See result below)

status vaules are:

UNKNOWN,
EDIT, // order is being edited
CREATED, //("Order has been placed"),
CANCELLED, //("Order was cancelled");
IN_PROGRESS, //("Order is in progress"),
COMPLETE, //("Order is finished"),
EXPIRED,
DELETED;

Progress stages 1/3 = CREATED, 2/3= IN_PROGRESS, 3/3= COMPLETE

*Alternate progress – show volume traded / original volume

Show as red/yellow CANCELLED or EXPIRED or DELETED

Return result from v1/getmyoffers.json

```
{
  "buyer": true,      =====> BUY==true  SELL==false
  "complete": true,
  "created": "2021-06-28T07:28:30.887Z",
  "custRef": "string", =====> add to panel as customer reference
  "exchRate": 0,
  "expiry": "2021-06-28T07:28:30.887Z",   =====> as 'expiry' and (calculate) 'remainig time'
  "feeAmt": 0,
  "fromAmount": 232444, =====> original amount
  "fromccy": {
    "ccyType": "ERC20",
    "description": "string",
    "enable": true,
    "id": 0,
    "name": "USDT",
    "timestamp": "2021-06-28T07:28:30.887Z",
    "tokenCtrAddress": "string"
  },
  "id": 0,
  "inProg": true,
  "live": true,
